## Over Three Millions in Gold Brought on the Lahn.

### Distill the Feature of the Early Trading.

The Wall street markets were exceedingly quiet this morning. Taken altogether, the tone showed an improvement, chiefly because of the absence of further bank troubles and other signs of returning confidence.

A striking illustration of the latter is the announcement by officials of savings banks that many of their depositors have received notices of their intention to withdraw deposits.

Furthermore, various banks and manufacturing concerns are resuming business, showing a marked improvement in making progress.

At the start General Electric was raised down 2 points to 40-1/2. The rest of the list fell 1-4 to 1-1-1/2 per cent. In sympathy, but the decline brought by the orders, and there was a sharp rally.

The feature was the feature, selling up from 17-3/8 to 18-1/8 on larger dealings than for some time.

A new movement was at work in the stock. After 11 o'clock Sugar declined 2 to 2-1/4 and General Electric 1-1/2 to 1-1/4.

The changes were narrow and unimportant. The steamship Lahn, which arrived last night, brought 1,047,000 francs from Southampton and 1,047,000 from Paris, constituting a total of 2,094,000 francs.

There was an increase in shipments of oats, rice, mill and other commodities. The gain in these commodities was offset in part by a decrease in wheat, lumber and cured meats. There was little change in the movement of corn, cotton, sugar, and other commodities.

A decrease of \$50,000 in the earnings of the St. Paul for the second week of August has been announced by all the Grangers.
